DAC 2 Rust Remover 100078

Description
Fukkol DAC2 is a special viscous liquid acid formulation having a special cationic type penetrant and stable inhibitor which provides effective protection on most metals and many other surfaces. It can be used in ways like dipping, brushing or wiping, etc.

Application
Ideal for pre-paint treatment of metal surfaces, finishing housing and panels, aluminum and tin boilers and molds, brightening aluminum and stainless steel. Also applicable for cleaning radioactive contaminated equipment, cleaning tile and grouting.

Benefits
DAC 2 has rapid wetting and penetrating ability, thus providing faster rust and corrosion removal than other commonly used acids. Effective in a wide range of temperatures. DAC 2 special inhibitor does not precipitate out and become inactive even after large amounts of rust and corrosion have been dissolved. DAC 2 rinses freely and contains no muretic acid.

Cleanology CL-FU-4442

Description
CLEANOLGY HEAVY DUTY STAIN CLEANER is pro-know that acids require to remove calcium, lime scale and rust. This professional grade concentrated acidic solution breaks up deposits quickly removing stain & buildup that other cleaner can't. CLEANOLGY HEAVY DUTY STAIN CLEANER is a pleasantly scented, all-purpose cleaner designed for the rapid removal of grime, lime, rust and other heavy soils. It instantly penetrates greasy and oily surfaces, providing powerful emulsifying ingredients that chemically soften and dissolve the deposits, making them easy to remove. A safe, effective, alternative to toxic cleaners, bleaches and solvents!

Application
1. Pre-Cast Concrete Pavers, 2. Masonry, 3. Flamed & Honed Granite, Flamed & Honed Limestone, 5. Cast Stone, 6. Quarry Tile, 7. Swimming Pool Sides, 8. Fountains.

Machinery Powerful Detergent 100364

Description
Machine Powerful Detergent is an emulsifiable machine degreaser and detergent that is suitable for use in self-contained and centralized systems. This product has been specifically developed for the machining industry to ensure cleanliness and sterility of soluble oil emulsions in service. Machine Powerful Detergent is also recommended for use when cleaning machines prior to refilling or top up. Machine Powerful Detergent provides a degreasing and disinfecting action in one complete clean.

Benefits
- Neutralizes bacterial infections
- Attacks and removes fungal growths
- Ensures pleasant odors effectively removes oil and slime
- Reduces down time costs

How to use
Dilute with hot or cold water (ratio: 1-20) in circulating system for 24-48 hours or directly use it by spray. Wear glove and mouth muffle before use.

CPS Sticker Remover 100516

Description
Fukkol Sticker Remover CPS is designed for removing problem of stickers. It leaves no sticky residue, harms no work-piece and affects no any work processing.

Application
1. Do not apply to food.
2. Long time skin contact may cause dry skin.
3. Use it in ventilated place.
4. Keep away from source of ignition.

100329 80G

100516 20G

Super Glue Remover 100329

Description
SUPER GLUE REMOVER may be applied directly to the cured adhesive surface and does not run or migrate. Allow sufficient time to penetrate and then begin rubbing, brushing, or sanding off softened adhesive layers. Several applications may be required to remove thick deposits of the adhesive. The parts may be soaked in the SUPER GLUE REMOVER as an alternative method. Always use SUPER GLUE REMOVER in a well-ventilated area.

Stain Cleaner

Electronic Cleaner 77438

Description
Fukkol Electronic Cleaner is a unique blend of petroleum distillates and alcohol. As a suitable precision cleaner, it is chemically inert and highly pure. Evaporates rapidly, leaves no residue and can instantly remove light contaminants, dust, lint, atmospheric oils, moisture and dirt. By dissolving and rinsing away contaminants, it helps prevent contact failure and malfunction. Also, it is CFC-free, ozone friendly and harmless to plastics and paper tapes.

Application
FUKKOL electronic cleaner can remove all types of electronic electrical equipments dirt, dust, light oils and fingerprints from Contacts, Printed Circuit Boards, Switches, Telephones, PCs, Motors, Relay, Generators, Connectors, Tape, Circuit Breakers and more.

Mould Cleaner 15548

Description
FUKKOL Mould Cleaner does not contain CFC113 or trichloroethane and is a unique blend of petroleum distillates and alcohol which provides a suitable precision cleaner for semi live electronics and electrical equipment. It is a cost effective alternative to all contact cleaners. It evaporates quickly and leaves no residue and is safe to use on all plastics.

Application
FUKKOL MOULD CLEANER it effectively removes dirt, dust, light oils and fingerprints from contacts, printed circuit boards, switches, telephones, PCs, motors, relay, generators, edge, connectors, tape heads, buss bars, circuit breakers.

FOOD GRADE CLEANER 11632

Description
FUKKOL FOOD GRADE CLEANER is used non-toxic formula approved by FDA. It can wipe out all kinds of oil contamination on machine parts, moulds and tools. FUKKOL FOOD GRADE CLEANER have strong clean ability and can quickly permeate all parts of the article.

Application
It is recommended to wipe out grease, fat, oil, stain contamination of all kinds of metal surface of electronic parts, precision mirrors, moulds, tools, Food Machinery parts, etc.

Precautions
- Shake well, hold upright and spray from a distance of approximately 20cm. One pass usually provides sufficient coating.
- Pressurized container, protect from sunlight, store at temperature below 50°C
- Do not puncture or incinerate the can
- Do not spray on to naked flame
- Inflammable

Mould Cleaner 11168

Description
Fukkol Mould Cleaner is a cleaning agent that is mild, does not harm plastics, has low flash point, contains no CFC113 or trichloroethane. It volatilizes rapidly and can be used in cleaning machine, mould and highly sensitive electronic equipments. It can effectively remove dirt and make the equipment stable. It can also greatly save manpower and cost for maintenance.

Application
Applicable for cleaning precise electronic instrument and mould, such as: electrical contact circuit board, switch, telephone, PC components, motor, relay, generator, magnetic head, current breaker, plug, socket, connector, lab instruments, etc.

Gas Marks & Gasket Remover 66866

Description
FUKKOL Gasket Remover is a solvent-based, high strength cleaner that helps remove based-on fiber gaskets, gasket adhesives and sealants. It quickly dissolves and aids in the removal of paints, lacquers and varnishes. Gasket Remover contains no methylene chloride.

Application
Recommended for the effective removal of conventional and formed-in-place gaskets on motors, pumps and flanges. Aids in dissolution and removal of paints, lacquers and varnishes. Removes graffiti from metal and stone.

Benefits
- Works quickly, softens and eases removal of gaskets, gasket cements and sealants.
- Loosens carbon deposits.
- Protects equipment surfaces. Reduces the need for excessive scraping.
- Excellent paint, varnish and graffiti remover, aggressive cleaner works efficiently.
- Contains no methylene Chloride.

Wax Remover 120353

The wax remover is refined from the imported surfactant which has strong degreasing action, effective accessory ingredient, etc., having advantages of fast, thorough and enduring wax removing, oil removing without damaging the substrate, long service life, non-toxicity and low foam, being biological degraded thoroughly, etc. Application method: ultrasonic cleaning steps: for solution preparation, it is required to add the water into a clean trough; when the water is heated to 60°C, add wax remover slowly while stirring and stir the solution sufficiently and evenly; and finally heat it to the required temperature for use.

Painto lic Paint Remover 100079

Description
Painto Lic is soaked at normal temperature for use, which is convenient, incombustible, with fast departing speed, widely used in metal painting layers to prevent the metal surface from any corrosion, discoloration, etc. when the paint layer on the metal surface is removed.

Application method
Soak the workpiece in the paint remover, and after the paint film is removed, take out the workpiece, make it clean and dry using pot scourer or towel. The soaking time is determined as per the paint thickness. As to the initial application or no experience in such application, it is recommended to make trial application first with a small amount, and then make application with a large amount.

Attention
- This product has slight irritant action and certain toxicity, labour protection appliance (including gloves and gauze masks) required in operation.
- Keep child away from the product and NO drinking.
- Keep the product in a cool and well-ventilated place; make eye-catching marks such as "hazard Don't touch" and "Don't expose the product in the sun."

Metal Polish Compound Oxide Remover 120132

Metal Polish Compound Oxide Remover is ideal for quickly cleaning your metal furniture and metal surfaces. Its Anti-Dust formula keeps surfaces looking less dusty, longer. It removes dust, smudges, and common allergens like pet dander found in dust from your wood furniture in a flash. Plus, it protects against water damage and stains. Dusting with Pledge leaves surfaces with no waxy buildup.

120132 200G

Wax Remover 120353

The wax remover is refined from the imported surfactant which has strong degreasing action, effective accessory ingredient, etc., having advantages of fast, thorough and enduring wax removing, oil removing without damaging the substrate, long service life, non-toxicity and low foam, being biological degraded thoroughly, etc. Application method: ultrasonic cleaning steps: for solution preparation, it is required to add the water into a clean trough; when the water is heated to 60°C, add wax remover slowly while stirring and stir the solution sufficiently and evenly; and finally heat it to the required temperature for use.

100372 External Wall Cleaner
FUKKOL EXTERNAL WALL CLEANER Concrete Cleaner is specially formulated to remove common contamination and atmospheric staining from a variety of substrates, including smooth architectural and engineered concrete, cast-in-place concrete, masonry, stone, granite, and decorative pavers. This general purpose, non-etching acidic cleanser removes dirt, mud, atmospheric dirt, mortar remains and other stains without altering the surface texture. LIGHT DUTY Concrete Cleaner adds depth to color and cleans white marbles and exposed aggregate.

100378 Aluminum Cleaner
FUKKOL ALU CLEANER is a sulfuric acid de-oil washing white agent used in room temperature. It is made up of various components and formulated for cleaning material. **FUKKOL ALU CLEANER** can remove the oxide film on the metal surface after sandblasting, painting and sandblasting with dipping and ultrasonic. It can make great smooth finish surface after staining and will not have effect on the pre-existing paint film, CNC turning, smooth finish.

100380 Auto Cleaner
FUKKOL AUTO CLEANER is a professional copper equipment cleaner with organic acid and active agent formula, which is designed for copper material and will not have electrochemical corrosion to copper equipment which is mainly used in condenser and evaporator heat exchanger equipment cleaning. **FUKKOL AUTO CLEANER** is characterized with corrosion safe, room temperature cleaning capable and quick cleaning speed.

100373 Floor Powerful Cleaner
FUKKOL FLOOR HEAVY DUTY CLEANER is a concentrated liquid blend of alkaline materials, surfactants and emulsifiers which will transform deposits into the form of a fine emulsion, easily dispersible in water. This new product is formulated to combine safe and effective features.

100367 Ultrasonic Detergent
FUKKOL Ultrasonic Detergent is a highly concentrated, aluminum safe multi metal liquid Alkaline Detergent engineered for the ultrasonic cleaning of the toughest contaminants on all metal. Specially in bicycle chain deep clean and oil remove.

100352 MIKI Wax 100
MIKI Wax 100 is made from advanced cleaning formula, it may clean efficiently dust, scales and dirt from wood floor and wood furniture. With special additive to keep furniture clean and a good condition when use it often.

100370 Gumice Disinfecting Hand Cleaner
Pumice Hand Cleaner is a natural, biodegradable hand cleaner, petroleum solvents. It cleans hands from orange. This hand cleaner has a fresh citrus scent and contains no artificial fragrances. Both the cream and lotion formulas are available in smooth or pumice. **Pumice Hand Cleaner** contains aloe vera, lanolin, glycerine and jojoba oil for skin conditioning.

Water Tower Treatment

Tower Maintain B 100323

As to water tower, the usual problems lie in the rust in circulating system, microbe and bacteria growing in the water which may agglomerate and adhere around the venturi and the channel as a block to make the circulating system abnormal and lack of heat dissipation. As a result, the water temperature will rise and the tower will lose cooling function, thus, more heavy maintenance will be required.

Maintenance

Actually, tower maintenance will become very easy after the above problems are resolved; no need professional skills. Currently, our company provides two kinds of maintaining products, economic and effective, specially designed for maintaining tower cooling system so as to prolong the life of the water tower system.

Application method

No matter the tower is old or new, just add the(A) cleanser in certain amount according to the Cleaner Proportion Table to the water and make the water circulate for one day, and then discharge the used water, and add clean water. Add(B) protective agent in certain amount according to the Cleaner Proportion Table to the water for heat dissipation. Thereafter, it is only required to add (B) protective agent for heat dissipation every four to seven months to get the tower perfect maintenance for a long time.

Air Condition Radiator Cleaner 100385

FD-24 Air Conditioning Coils Cleaner is a viscous liquid which has been formulated specifically for cleaning and brightening stainless steel and aluminum trim, window frames, storm windows, screening and air conditioning coils. The product will not etch glass, so no masking is necessary.

Tower Clean A 100322

Tower Clean A is an acidic liquid which can be used to remove special water scales such as water scale, oxides, etc., without etching any metal materials in acid cleaning.

Application method

Tower Clean A is specially used to eliminate the special water scales in circulating cooling system, heat exchange system, condenser, etc.

Fungicide 100326

FUKKOL Fungicide can be used with all types of water mix metalworking fluids. It is formulated to eliminate fungus and prevent the formation of fungal growths which can cause blockages and lead to costly downtime.

FUSICLEAN System Cleaner 100324

FUKKOL Fusiclean System Cleanser is a nitrite free medium to heavy duty machine, tool cleaner and steriliser, based upon a powerful detergent. It has been specifically formulated to deal with a wide variety of machine tool contaminants and is easy to use with minimum disruption to production, being added direct to the coolant system whilst still in operation. Not applicable to neat oil system.

Fungicide 100326

High mould inhibitor can be dissolved with various forms of water and can be used in metal products. It can eliminate fungi or prevent fungal growth, and control the blockage caused by bacterial growth, thus improving work efficiency.

Anti Foam X 100518

FUKKOL Anti Foam X is modified dimethyl siloxane with the characteristics of non-volatile, non-toxic, odorless. It is milk white liquid and insoluble in water. It can be dissolving in organic solvent, such as aliphatic hydrocarbon, with well heat stability (stable under 200°C). It has well antifoaming effect with little dosage.

Bactericide 100325

FUKKOL Bactericide is a nitrite-free medium to heavy duty machine, tool cleaner and steriliser, based upon a powerful detergent. It has been specifically formulated to deal with a wide variety of machine tool contaminants and is easy to use with minimum disruption to production, being added direct to the coolant system whilst still in operation. Not applicable to neat oil system.
